Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on March 17, 1999, May 25, 1999 and May 27, 1999. It is noted, however, that applicant has not filed a certified copy of the 11-71677, 11-71678, 11-144332 and 11-147812 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear within the claim language of independent claims 1,6,7 and 12 as to what applicant means by a pumping light reflection portion and its structural relation with the pumping light recited in the preamble.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1-8 and 10-12
 Claims 7, 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hughes (PN 5.0550.173).

In figure 2 Hughes illustrates a laser system having a fiber bundle with a doped core of Nd, which receives an excitation light from laser diode array (12) and a mirror (13) for reflecting a portion of the laser beam back to fibers and outputting a portion of the beam.

FIG. 2

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hughes (PN 5.0550.173) in view of Kafka (PN 3,639,672).

In figure 2 Hughes illustrates a laser system having a fiber bundle with a doped core of Nd, which receives an excitation light from laser diode array (12) and a mirror

(13) for reflecting a portion of the laser beam back to fibers and outputting a portion of the beam.

Hughes does not disclose using a cooling medium within the bundle of fibers to cool the fibers.

In the abstract and in column 4 lines 35-40 Kafka teaches using a cooling medium within the bundle of electrical conductors made of glass fiber to maintain a low temperature.

Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to use a cooling medium within the fiber bundle of Hughes because it would maintain the fibers at a low temperature.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Armando Rodriguez whose telephone number is (703) 308-6218. The examiner can normally be reached on 10-hour day / M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7721 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-4881.
